

LCS CERTIFIED

Ulbrich Shaped Wire Receives LCS Approval

Ulbrich Shaped Wire has successfully achieved Laboratory Controlled at Source (LCS) approval from Pratt & Whitney UTC. This certification allows the company's North Haven, CT, facility to begin providing LCS certified materials to its worldwide customer base.

Ulbrich Shaped Wire specializes in the manufacture of custom made shapes and flats for a wide variety of industries. Depending on the complexity of the profile, shapes may be either net or near net suitable for stamping, coining, forming, or machining. All tooling is custom manufactured in house by our state of the art tooling center. We also offer metallurgical and engineering support for all customers. Ulbrich supplies a wide range of alloys including Titanium Shaped Wire, which can be processed into header bar for aerospace heat exchangers as well as gas turbines. Learn more at www.ulbrich.com.
