At Ulbrich, we understand medical device development timelines continue to be reduced. The need for device designers to iterate quickly is accelerating and rarely supported by the supply chain. To better serve our customers’ ever increasing requirements, we have developed our fine wire stocking program.

» We provide you the ability to obtain a variety of round and flat wire quickly

» This program can have wire in your hands in 72 hours or less

» Product ships within 24 hours of order acknowledgement

» Your project teams are now able to meet their timelines while incorporating all the design performance characteristics your devices require
